

Chapter 1:
Lesson 8: Slope

Slope measures steepness

Ramp:

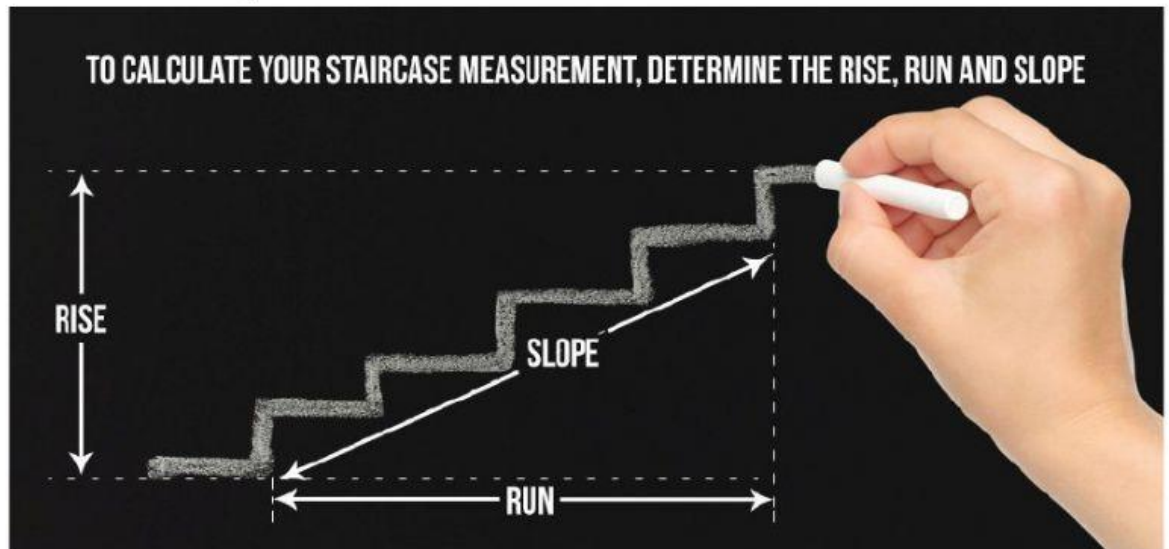

Escalator:

Find the slope:

1. Stairs / Steps:

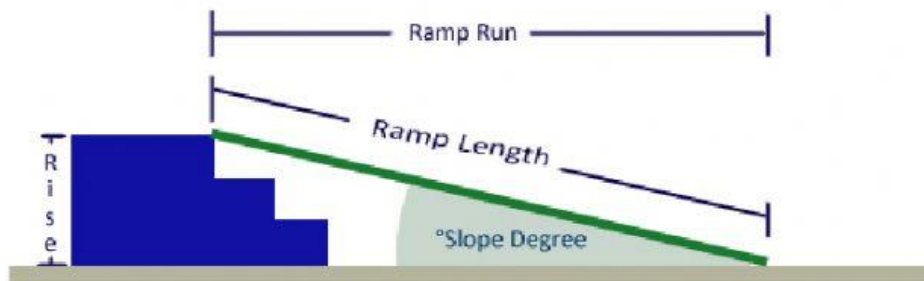

Rise = 24 feet

Run = 6 feet

Slope =

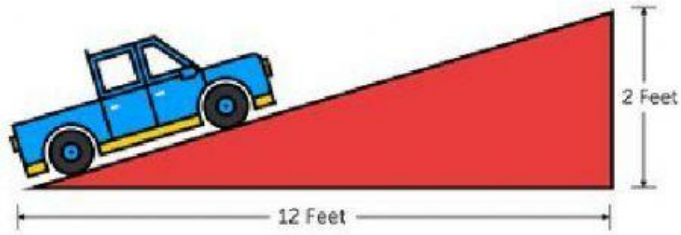

2. Ramp:

Find the slope of the ramp, if rise = 5 feet and run = 10 feet.

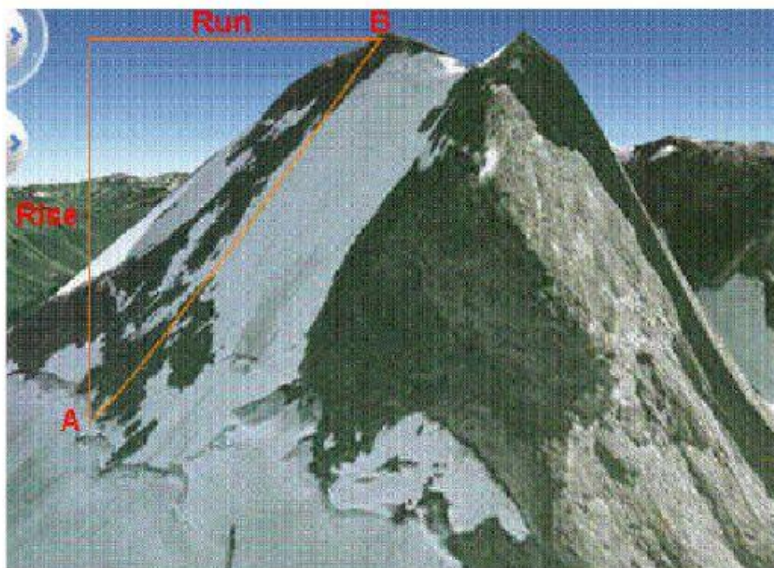

Slope = (Give the answer as a decimal)

3. Ramp:

Slope = (Give the answer as a fraction)

4. Mountain:

Find the slope of the mountain if the rise is 7500 m and the run is 250 m.

Slope =
