

EXERCÍCIOS DE FIXAÇÃO - POLÍGONOS INSCRITOS E CIRCUNSCRITOS - Prof. Hipácia - Arraste e solte:

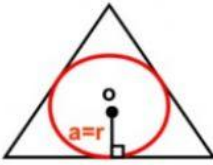

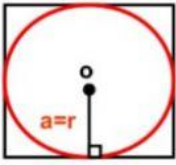

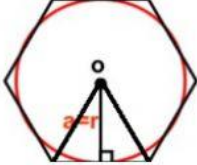

POLÍGONOS INSCRITOS NO CÍRCULO

			<input type="text" value="r"/>
<input "="" type="text" value="L="/>	<input "="" type="text" value="L="/>	<input "="" type="text" value="L="/>	<input type="text" value="r√3"/>
<input "="" type="text" value="L="/>	<input "="" type="text" value="L="/>	<input "="" type="text" value="L="/>	<input type="text" value="r√2"/>

POLÍGONOS CIRCUNSCRITOS AO CÍRCULO

			<input type="text" value="2r"/>
<input "="" type="text" value="L="/>	<input "="" type="text" value="L="/>	<input "="" type="text" value="L="/>	<input type="text" value="2r√3/3"/>
<input "="" type="text" value="L="/>	<input "="" type="text" value="L="/>	<input "="" type="text" value="L="/>	<input type="text" value="2r√3"/>

Cálculo do Apótema

			<input type="text" value="a = L√3/2"/>
<input "="" type="text" value="L="/>	<input "="" type="text" value="L="/>	<input "="" type="text" value="L="/>	<input type="text" value="a = L/2"/>
<input "="" type="text" value="L="/>	<input "="" type="text" value="L="/>	<input "="" type="text" value="L="/>	<input type="text" value="a = h/3"/>

1- FN/19. No quadrado ABCD inscrito na circunferência de raio 4cm apresenta área igual a:

2- O perímetro do hexágono regular inscrito na circunferência é de $18\sqrt{3}$

O perímetro do triângulo equilátero circunscrito será:

3- O apótema de um triângulo equilátero inscrito numa circunferência mede 8 cm. O lado do hexágono regular inscrito nessa circunferência mede?

- a) 8 cm.
- b) $8\sqrt{2}$ cm.
- c) 16 cm.
- d) $16\sqrt{2}$ cm.
