Division diagram for  $348 \div 3$ . The dividend 348 is shown in red boxes. The divisor 3 is shown in a purple box. The quotient 116 is shown in a grid of squares: the first row has 1 red square and 1 purple square; the second row has 1 red square and 1 purple square; the third row has 1 red square and 1 purple square. The remainder 0 is shown in a purple box at the bottom.

Division diagram for  $464 \div 4$ . The dividend 464 is shown in red boxes. The divisor 4 is shown in a purple box. The quotient 116 is shown in a grid of squares: the first row has 1 red square and 1 purple square; the second row has 1 red square and 1 purple square; the third row has 1 red square and 1 purple square. The remainder 0 is shown in a purple box at the bottom.

Division diagram for  $595 \div 5$ . The dividend 595 is shown in red boxes. The divisor 5 is shown in a purple box. The quotient 119 is shown in a grid of squares: the first row has 1 red square and 1 purple square; the second row has 1 red square and 1 purple square; the third row has 1 red square and 1 purple square. The remainder 0 is shown in a purple box at the bottom.

Division diagram for  $135 \div 5$ . The dividend 135 is shown in red boxes. The divisor 5 is shown in a purple box. The quotient 27 is shown in a grid of squares: the first row has 1 purple square and 1 orange square; the second row has 1 red square and 1 purple square; the third row has 1 red square and 1 purple square. The remainder 0 is shown in an orange box at the bottom.

Division diagram for  $168 \div 4$ . The dividend 168 is shown in red boxes. The divisor 4 is shown in an orange box. The quotient 42 is shown in a grid of squares: the first row has 1 purple square and 1 orange square; the second row has 1 red square and 1 purple square; the third row has 1 red square and 1 purple square. The remainder 0 is shown in an orange box at the bottom.
