

Name :

Class :

Date :

Contoh

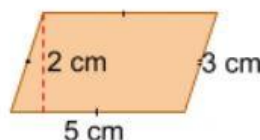

Segitiga

$$K = 3 + 4 + 6 = 13 \text{ cm}$$

$$L = \frac{4 \times 2}{2} = 4 \text{ cm}^2$$

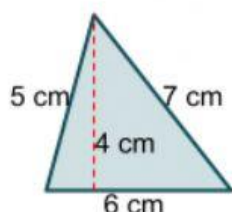

Jajar Genjang

$$K = (5 + 3) \times 2 = 16 \text{ cm}$$

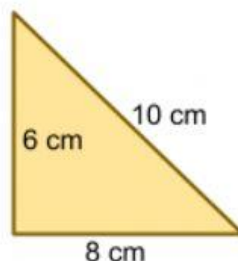

$$L = 5 \times 3 = 15 \text{ cm}^2$$

Hitunglah luas dan keliling bangun datar di bawah ini!
(Kerjakan sesuai contoh di atas)

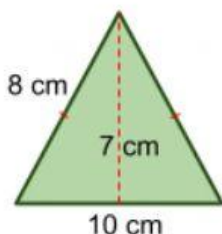

$$K = \quad + \quad + \quad = \quad \text{cm}$$

$$L = \frac{\quad \times \quad}{2} = \quad \text{cm}^2$$

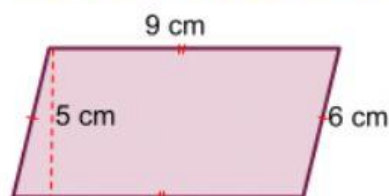

$$K = \quad + \quad + \quad = \quad \text{cm}$$

$$L = \frac{\quad \times \quad}{2} = \quad \text{cm}^2$$

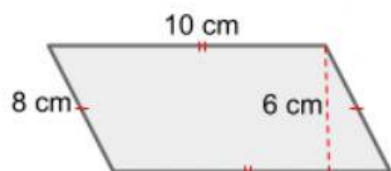

$$K = \quad + \quad + \quad = \quad \text{cm}$$

$$L = \frac{\quad \times \quad}{2} = \quad \text{cm}^2$$

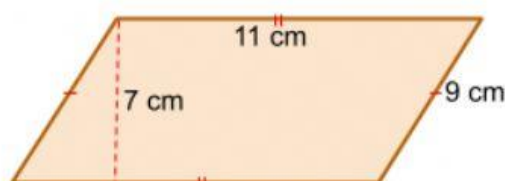

$$K = (\quad + \quad) \times \quad = \quad \text{cm}$$

$$L = \quad \times \quad = \quad \text{cm}^2$$

$$K = (\quad + \quad) \times \quad = \quad \text{cm}$$

$$L = \quad \times \quad = \quad \text{cm}^2$$

$$K = (\quad + \quad) \times \quad = \quad \text{cm}$$

$$L = \quad \times \quad = \quad \text{cm}^2$$

Target leadership

- Bertanggung jawab menyelesaikan tugas tepat waktu
- Mau dan mampu mencoba hal baru
