

1. (a) Lengkapkan jadual di bawah menggunakan perkataan yang diberi.
Complete the table below using the words given.

Sistem Bumi Earth System	Penerangan Explanation
Geosfera Geosphere	Mengandungi mineral yang sangat berguna untuk kehidupan manusia. Contains minerals that are very useful for human life.
Hidrofera Hydrosphere	Membekalkan sumber makanan seperti ikan, sotong dan udang. Supplies food sources such as fish, squids and shrimps.
Atmosfera Atmosphere	Mengandungi ozon dan menyerap sinar berbahaya dari Matahari. Contains ozone and absorbs the harmful rays from the sunlight.
Biosfera Biosphere	Komponennya saling berinteraksi mengekalkan keseimbangan oksigen dan karbon dioksida. The components interact with each other to maintain a balance of oxygen and carbon dioxide.

2. Lautan boleh dibahagikan kepada beberapa zon mengikut kedalamannya. Labelkan zon lautan dalam rajah di bawah.
Ocean can be divided into several zones according to their depths. Label the zones of ocean in the diagram below.

Zon permukaan
Surface zone

Zon senja
Midnight zone

Zon gelap
Dark zone

3. (a) Padankan proses utama Bumi dengan fenomena yang sesuai.
Match the main processes of the Earth to the suitable phenomena.

Proses eksogen
Exogenic process

Proses endogen
Endogenic process

Perolakan mantel
Mantle convection

Pengendapan
Sedimentation

Hujan asid
Acid rain

[2 markah/marks]

- (b) Gariskan jawapan yang betul tentang proses endogen. / Underline the correct answers about the endogenic process.
