

# Human Brain – Parts and Functions

- I. Label the different parts of the brain. **Cerebellum, Brainstem, Occipital Lobes, Parietal Lobes, Frontal Lobes, Temporal Lobes.**

## II. Match the part of the brain with its function.

- |  |                           |
|--|---------------------------|
| 7. It's in charge of the balance, the posture and coordination.  | a) <b>Brainstem</b>       |
| 8. The largest part of the brain, composed of right and left hemispheres.  | b) <b>Hypothalamus</b>    |
| 9. It performs involuntary actions such as breathing, blood pressure, heartbeat, many reflexes.                        | c) <b>Hippocampus</b>     |
| 10. Some of its functions are: releasing hormones, regulating body temperature, controlling appetite.                  | d) <b>Frontal Lobes</b>   |
| 11. Reading, interpreting colors and distance, recognizing faces are some of its functions.                            | e) <b>Occipital Lobes</b> |
| 12. It has a major role in learning and storing long-term memories.  | f) <b>Temporal Lobes</b>  |
| 13. Some of its functions are: hearing, speech, memory, and processing emotions.                                       | g) <b>Cerebrum</b>        |
| 14. It provides sensory information to the brain including touch, pain, temperature, and mathematical calculations.    | h) <b>Cerebellum</b>      |
| 15. Planning, problem solving, movement, decision making, learning, memory, impulse control are some of its functions. | i) <b>Parietal Lobes</b>  |
