

1) Erreperatu adibideari eta kalkulatu.

$$\sqrt{25} = 5 \quad \text{honegatik: } 5^2 = 5 \times 5 = 25$$

$$\sqrt{64} = \square \rightarrow \square^2 = \square \times \square = \square$$

$$\sqrt{81} = \square \rightarrow \square^2 = \square \times \square = \square$$

$$\sqrt{36} = \square \rightarrow \square^2 = \square \times \square = \square$$

2) Kalkulatu eta hutsuneak bete:

$$\sqrt{49} = 7 \rightarrow 7^2 = 49$$

$$\sqrt{16} = \square \rightarrow \square^2 = \square$$

$$\sqrt{100} = \square \rightarrow \square^2 = \square$$

$$\sqrt{9} = \square \rightarrow \square^2 = \square$$

$$\sqrt{121} = \square \rightarrow \square^2 = \square$$

3. LOTU HURRENGO BERREKETAK DAGOKION EMAITZAREKIN:

$$11^2$$

$$15^2$$

$$14^2$$

$$8^2$$

$$20^2$$

$$9^2$$
