

Strong passwords

Part 1

True or false

	Statement	True or False
1	It is a good idea to write your password somewhere.	
2	Your password should be less than eight characters.	
3	Sentences or phrases make good passwords.	
4	Someone can steal your identity if you don't have a strong password.	
5	Do not use personal information in your password, like your date of birth.	

Part 2

Click on the link and try and create a new password that is really strong.

Try and get a result like this

How secure is your password?

Tip: When adding a capital or digit to your password, don't simply put the capital at the start and the digit at the end

Show password: ☐

Strong

20 characters containing:

✓ Lower case

✓ Upper case

✓ Numbers

✓ Symbols

Time to crack your password:
4 months

Review: Good, using that password is like locking your front door and keeping the key in a safety deposit box.

Your passwords are never stored. Even if they were, we have no idea who you are!
