READING

2. Read about the three waterfalls and write AF (Angel Falls), NF (Niagara Falls) or VF (Victoria Falls)

❶ **Angel Falls** Deep in the tropical forest of Venezuela is the tallest permanent waterfall in the world. 'Permanent' means that there's water all year and people can visit it at any time. There are other higher waterfalls than Angel Falls, but they're usually 'dry' during some months. This waterfall drops 979 metres from a flat mountain, and travelling there to see it is an adventure. Visitors usually take a plane and then a small boat to get there.

❷ **Niagara Falls** It's probably the most famous waterfall in North America. It's about 52 metres high. It isn't the highest or the widest waterfall in the world, but it's the biggest one in volume: 2.8 million litres of water fall per second. The Niagara falls are in Canada and the USA. You can visit both sides and it's easy to drive there. 'The Maid of the Mist' is a boat tour that takes tourists very close to the falls. It lasts three hours and it's one of the oldest tourist attractions in the area.

❸ **Victoria Falls** This waterfall is on the border of Zambia and Zimbabwe in southern Africa. At the centre of it, it's 108 metres high and 1,708 metres wide, which makes it the largest single waterfall in the world. It's about twice as big as Niagara Falls. Victoria Falls is formed as the Zambezi River falls from a cliff called 'First Gorge'. It isn't difficult to reach the falls. They are very close to a town, also called Victoria Falls, and visitors can get there by train, car or bus.

❶ ____ It's the highest waterfall.

❷ ____ It's the largest (but not the highest) waterfall.

❸ ____ It has the biggest quantity of water.

❹ ____ It's in a rainforest.

❺ ____ It's the most difficult to get to.

❻ ____ and ____ They're on the border of two countries.
