## UNIT 7B page 104 - 105

## A. Discuss.

• What do you do to protect the environment?

leave the house or a room. I don't the water running while I am taking a shower or brushing my teeth.  *What more could you do?  avoid	litter	turn off	recycle	leave
I should try to recycle more, like batteries. I should buying which is hard to recycle. I should walk or my bike to school instead of having my parents drive me there.  B. Read the text quickly and decide which of the two headings, a or b, is more suitable for each of the paragraphs 1-3.  **EVERY DIG GFEETS**  Everybody buys and uses a variety of products every day without giving it a lot of thought. You might not have realised it, but each of these products affects the environment somehow; through the way it is made, used or disposed of. For this reason, eco-scientists are trying to come up with ideas to introduce environmentally-friendly products into our lives. Their motto is REDUCE, REUSE, RECYCLE!  **A Save water**  B. Read the text quickly and decide which of the two headings, a or b, is more suitable for each of the paragraphs 1-3.  **EVERY DIG GFEETS**  Everybody buys and uses a variety of products every day without giving it a lot of thought. You might save the battery day without giving it a lot of thought. You might say but it also contains a suitable for each of these products affects the environment somehow; through the way it is made, used or disposed of. For this reason, eco-scientists are trying to come up with ideas to introduce environment ally-friendly products into our lives. Their motto is REDUCE, REUSE, RECYCLE!  **A Save water*  B. Read the text quickly and decide which of the two headings, a or b, is more self uses to introduce environment somehow; through the way it is made, used or disposed of. For this reason, eco-scientists are trying to come up with ideas to introduce environment all. From phone to flower on the water shower, powered by the water used while having a shower. This means that you don't need to have the bathroom light on, which saves electricity, it is any to instance the phone serving the phone se	leave the house	or a room. I don't

For this reason, eco-scientists are trying to come up with ideas to introduce environmentally-friendly products into our lives. Their motto is REDUCE, REUSE, RECYCLE!  a Save water  b Kill two birds with one stone  How eco-friendly are you at one stone  How eco-friendly are you at home? We tend to waste a lot of energy, which is not particularly good for the environment. Well, a new showerhead has been designed to help us out in two different ways. Firstly, it is a light for the shower, powered by the water used while having a shower. This means that you don't need to have the bathroom light on, which saves electricity. It is easy to install and has another interesting feature. You must have found yourself in a situation where you step into the shower and the water is either too cold or too hot. Well, this showerhead has an indicator which glows blue or red when the water is too cold or too hot, and turns off when the water has reached the right temperature and needs no more heating. It's sure to be a feature in homes all				neutings, a or M, is more
How eco-friendly are you at home? We tend to waste a lot of energy, which is not particularly good for the environment. Well, a new showerhead has been designed to help us out in two different ways. Most mobile water the water the water to the very frequence of the very freq	ger to keep up with set technological trends, consumers tend out their phones after an average of 18 and buy the latest model. If you take into tion that about 4.5 billion mobiles are in wide, then it's not surprising that there are so funwanted phones across the globe. The phones contain hazardous materials ling them is difficult and costly. However, rs in England have created a mobile tech materials. 'So, what?' you might say, contains a sunflower seed. So, when want the phone any longer, you simply

Recyclable handbags

Sometimes the most unlikely combinations have very successful results, and can also have a positive effect on the environment. A company in the USA noticed how many old car number plates were left on the side of roads or in junkyards. They took the number plates and thought of a way to recycle them. They turned them into fashionable handbags and CD cases! You may not have seen them

WLCMT-90

before, but they have become a huge success. The company now provides a service where you can send your own old number plate to be turned into a handbag. They are also looking into using other parts of cars to create fashionable accessories. It just shows you that you can look good and be ecofriendly at the same time. So have you got a number plate that you want to get rid of?

## C. Read the text again and answer the questions.

- 1. Where does the eco-friendly showerhead get its power from?
- 2. How can you tell if the water is too hot with the eco-friendly showerhead?
- 3. What usually happens to mobile phones after 18 months?
- 4. What do you do with the mobile developed by English researchers when you've finished with it?
- 5. What happens to the biodegradable case?
- 6. Where does the company that makes fashionable handbags get materials from?
- 7. How can you get a personalised handbag made?

D. Find words / phrases in the text and match them with the definitions below.
1. get rid of (introduction):
2. provide energy so that something works (paragraph 1):
3. produce a soft, steady light (paragraph 1):
4. often (paragraph 2):
5. very keen and excited about something one wants to do (paragraph 2):
6. dangerous, harmful (paragraph 2):
7. a place where old cars, machines, etc. are collected (paragraph 3):
