### Layang-layang

$$K = (3 + 6) \times 2 = 18 \text{ cm}$$

$$L = \frac{8 \times 5}{2} = 20 \text{ cm}^2$$

### Contoh

### Belah Ketupat

$$K = 4 \times 3 = 12 \text{ cm}$$

$$L = \frac{5 \times 6}{2} = 15 \text{ cm}^2$$

Hitunglah luas dan keliling bangun datar di bawah ini!  
(Kerjakan sesuai contoh di atas)

$$K = ( \quad + \quad ) \times \quad = \quad \text{cm}$$

$$L = \frac{\quad \times \quad}{2} = \quad \text{cm}^2$$

$$K = ( \quad + \quad ) \times \quad = \quad \text{cm}$$

$$L = \frac{\quad \times \quad}{2} = \quad \text{cm}^2$$

$$K = ( \quad + \quad ) \times \quad = \quad \text{cm}$$

$$L = \frac{\quad \times \quad}{2} = \quad \text{cm}^2$$

$$K = \quad \times \quad = \quad \text{cm}$$

$$L = \frac{\quad \times \quad}{2} = \quad \text{cm}^2$$

$$K = \quad \times \quad = \quad \text{cm}$$

$$L = \frac{\quad \times \quad}{2} = \quad \text{cm}^2$$

$$K = \quad \times \quad = \quad \text{cm}$$

$$L = \frac{\quad \times \quad}{2} = \quad \text{cm}^2$$
