

SCIENCE: MEASURING TOOLS and Tools used by Life Scientists:

Complete the Table below by filling in the open spaces.

Instrument	Name of the Instrument	Measuring	SI - Unit	Abbreviation
				
				
				
				
				cm^3

Scientific Tools Used by Life Scientists:

Balance	Pipette	Magnifying lens	Computer	Microscope	Science journal	slide	Dissecting Tools	Thermometer
---------	---------	-----------------	----------	------------	-----------------	-------	------------------	-------------

	To record descriptions, explanations, plans and steps used in a Scientific Inquiry.	
	To draw up and transfer liquids.	
	Enable you to observe small objects that you cannot observe with your naked eyes.	
	Measures the temperature of substances.	
	Measure mass.	
	To send information with and for researching information.	
	A thin, rectangular piece of glass used to put under a microscope to be observed.	
	A hand-held lens that magnifies, or enlarges, an image of an object.	
	Scientists use these tools, such as scalpels and scissors, to examine tissues and organs.
