

1 The Case for Neuroscience in the Art 2 of Teaching

3 Mind, Brain, and Education (MBE) Science is the new and
4 improved brain-based learning. It is the scientifically
5 substantiated art of teaching. It is the intersection of
6 neuroscience, education, and psychology. And it is a
7 paradigm shift in formal education. This chapter explains its
8 basic parameters and history.

Une las construcciones a sus significados y completa la que falta.
