

Calculate the density of objects

Volume of Rock

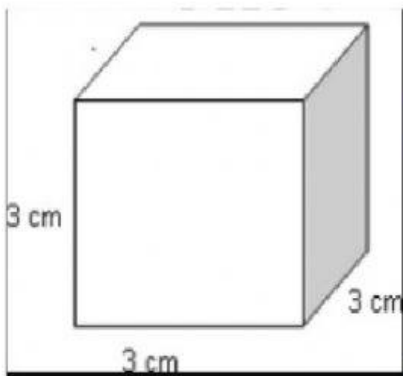

$$\begin{aligned} &= \boxed{} - \boxed{} \\ &= \boxed{} \text{ Cm}^3 \end{aligned}$$

Mass of Rock

$$= 200 \text{ Grams}$$

Density of Rock

$$\begin{aligned} &= \boxed{} \div \boxed{} \\ &= \boxed{} \text{ Grams/cm}^3 \end{aligned}$$

Volume of Block

$$\begin{aligned} &= \boxed{} \times \boxed{} \times \boxed{} \\ &= \boxed{} \text{ Cm}^3 \end{aligned}$$

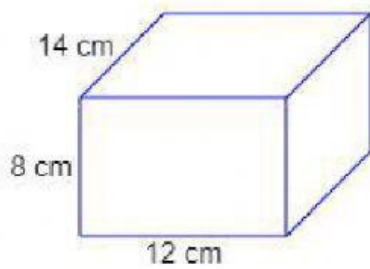

Mass of Rock

$$= 135 \text{ Grams}$$

Density of Rock

$$\begin{aligned} &= \boxed{} \div \boxed{} \\ &= \boxed{} \text{ Grams/cm}^3 \end{aligned}$$

Sreekanth Ramachandran

Volume of Block

$$= \square \times \square \times \square$$

$$= \square \text{ Cm}^3$$

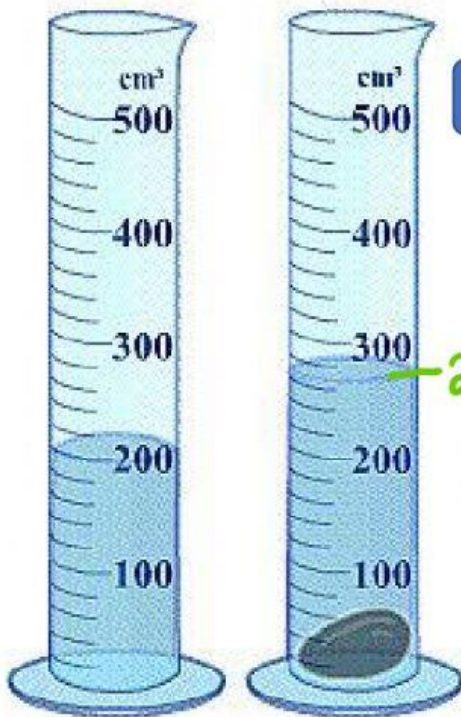

Mass of Rock

$$= 8064 \text{ Grams}$$

Density of Rock

$$= \square \div \square$$

$$= \square \text{ Grams/cm}^3$$

Volume of Rock

$$= \square - \square$$

$$= \square \text{ Cm}^3$$

Mass of Rock

$$= 200 \text{ Grams}$$

Density of Rock

$$= \square \div \square$$

$$= \square \text{ Grams/cm}^3$$
