

# Layers of the Earth

This layer is made up of gases, like nitrogen and oxygen

**HYDROSPHERE**

It is where all living organisms live; animals, plants, humans....

**GEOSPHERE**

It is the solid part of the Earth.

**ATMOSPHERE**

It helps to maintain the Earth's temperature.

**BIOSPHERE**

It has three layers; core, mantle and crust.

**ATMOSPHERE**

It is the solid, liquid and gas water that covers the Earth.

**GEOSPHERE**
