

CALCULATING THE MEAN

To find the average/mean/arithmetic mean you must:

a) add up all the numbers

b) divide the total by the number of numbers that you added.

Find the mean of each group of data.

1. 33, 11, 55, 22, 44 Mean =

2. 65, 85, 75, 55, 45 Mean =

3. 120, 160, 140 Mean =

4. 55, 45, 15, 35, 65, 25, 75 Mean =

5. 750m, 250m, 500m Mean =

6. 41 cupcakes, 19 cupcakes, 33 cupcakes Mean =

7. 72 books, 34 books Mean =

8. 64mm, 16mm, 1mm, 19mm Mean =

9. There are 14 pupils in Class 1, 18 pupils in Class 2, 15 pupils in Class 3 and 25 pupils in Class 4. What is the average number of pupils in each class?

Mean =

10. What is the average of 13 crayons, 17 crayons and 15 crayons?

Mean =
