

Let's help astronaut Abby and Maestro blast the meteorites with the lasers.  
 Remember all the lasers must shoot exactly the same amount of meteorites.  
 Complete the long division sum and write the number of times each laser must  
 blast on the line below. Good luck!

$$\begin{array}{r}
 \square \square \\
 \hline
 3 \overline{) 72} \\
 - \square \downarrow \\
 \square \square \\
 - \square \square \\
 \square \square
 \end{array}$$

Each laser must blast  
 \_\_\_\_\_ meteorites

$$\begin{array}{r}
 \square \square \\
 \hline
 4 \overline{) 44} \\
 - \square \downarrow \\
 \square \square \\
 - \square \square \\
 \square \square
 \end{array}$$

Each laser must blast  
 \_\_\_\_\_ meteorites

$$\begin{array}{r}
 \square \square \\
 \hline
 5 \sqrt{95} \\
 - \square \downarrow \\
 \square \square \\
 - \square \square \\
 \square \square
 \end{array}$$

Each laser must blast  
 \_\_\_\_\_ meteorites

$$\begin{array}{r}
 \square \square \\
 \hline
 3 \sqrt{45} \\
 - \square \downarrow \\
 \square \square \\
 - \square \square \\
 \square \square
 \end{array}$$

Each laser must blast  
 \_\_\_\_\_ meteorites
