2. Read the following text and answer the question below.

TANJUNG PUTING NATIONAL PARK

One of the internationally famous ecotourism destinations in Indonesia is Tanjung Puting National Park in the southwest of Central Kalimantan peninsula. Tanjung Puting National Park offers impressive experience to its visitors. This is called a park, but unlike any park that you have seen in your city, this is a jungle! It is a real jungle, which is home to the most incredible animals in the world: orang utans and proboscis monkeys! The male proboscis monkeys are interesting because they have enormous snout. So, imagine yourself to be in the jungle and meet these special animals in their original habitat. What will you do when you meet them?

To see orang utan we should go to Camp Leakey. Cam Leakey is located in the heart of Tanjung Putting National Park. This is a rehabilition place for ex-captive orang utans and also a preservation site. This camp was established by Birute Galdikas, an important scientist who has studied orang utans since 1971.

To reach the place, we should take a boat down sekonyer river. The boat is popularly called perahu klotok which is a boathouse that can accommodate four people. The trip by the boat to Camp Leaky takes three days and two nights.

The travelling in the boat offers another unforgettable experience. You sleep, cook and eat in that klotok, night and day during your journey into the jungle. In daylight, on your way to Camp Leakey, you can see trees filled with proboscis monkeys. At night, you can enjoy the clear sky and the amazingly bright stars as the only lights for the night.

3. Read the following text and answer the question below

Taj Mahal

Taj Mahal, an epitome of love, is actually a mausoleum. Standing majestically on the banks of River Yamuna, the Taj Mahal is synonymous to love and romance. Taj Mahal was constructed by Mughal Emperor Shah Jahan in the memory of his beloved wife and queen. The name "Taj Mahal" was derived from the name of Shah Jahan's wife, Mumtaz Mahal, which means crown of palaces

Taj Mahal represents the finest architectural and artistic achievement. The mausoleum was constructed of pure white marble. The white marble is inlaid with semi-precious stones (including jade, crystal, lapis lazuli, amethyst and turquoise) that form the intricate designs. Its central dome reaches a height of 240 feet (73 meters). The dome is surrounded by four smaller domes. Four slender towers, or minarets, stand at the corners. Inside the mausoleum, an octagonal marble chamber adorned with carvings and semi-precious stones house the false tomb of Mumtaz Mahal. Her actual remains lie below, at garden level.

Taj Mahal shows shades of magnificent beauty at different time during the day. At dawn when the first rays of the sun hits the dome of this epic monument, it radiates like a heavenly pinkish palace. At daytime, when the sky is bright and clear, the Taj looks milky white. At a moonlit night when the full moon rays fall on the glistening white marble, the cool moon rays reflect back from the white marble and give the Taj Mahal a tinge of blue color. It's simply breathtaking! With such beauty, no wonder that Taj Mahal becomes one of the the Seven Wonders of the World.

a. What is Taj Mahal Actually
b. What is the purpose writing in the essay
c. Found 5 words and make it into simple present tense.
