a.

b.

c.

d.

e.

7. Bile can be transferred to the **gall bladder** for storage via the _____ duct. **Bile** can be released from the gall bladder into the small intestine when the **sphincter of** _____ _____ is open.

LIVEWORKSHEETS

10. Pancreatic digestive secretions include:

a. _____ to buffer acidic gastric juices.

b. _____ to dilute acidic gastric juices.

c. _____ to continue chemical digestion in the small intestine.

G. Head Cross Section

Describe the following

1. Orbicularis (lips)

2. Tongue

3. Hard palate

4. Soft palate

5. Oral cavity

6. Laryngopharynx

7. Select any tooth

LIVEWORKSHEETS

H. Thorax Cross Section

Describe the following

1. Right and left lungs

2. Right and left brachiocephalic veins

3. Aortic arch

4. Trachea

5. Esophagus

6. T04 vertebra

I. Abdominal Cross Section

Describe the following

1. Peritoneum

2. Three liver segments (medial segment, anteromedial segment, and right anterolateral segment)

3. Gall bladder

LIVEWORKSHEETS

4. Right and left kidneys

5. Lesser omentum

6. L01 vertebra

7. Stomach

8. Pancreas (body and tail)

9. Descending aorta

10. Inferior vena cava

11. Spleen

J. Pelvis Cross Section.

Describe the following

1. Peritoneum

2. Bladder

3. Rectum

4. Coccyx
