

Thermal insulators and conductors 4º

Choose the right answer

- a) The molecules in matter move.
- b) The molecules in matter do not move.

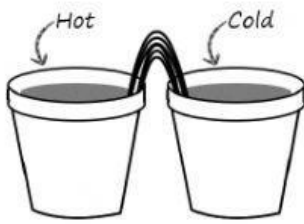

- a) We can see the movement of molecules.
- b) We feel the movement of molecules as **heat**.

- a) At low temperatures molecules move very slowly.
- b) At low temperatures molecules move very quickly.

- a) At high temperatures molecules move very slowly.
- b) At high temperatures molecules move very quickly.

a) Water is a thermal conductor.

b) Water is a thermal insulator.

a) Wood is a thermal conductor.

b) Wood is a thermal insulator.

a) Metal is a thermal conductor.

b) Metal is a thermal insulator.

a) Glass is a conductor.

b) Glass is an insulator.

a) Plastic is a conductor.

b) Plastic is an insulator.
