

A collage of mathematical concepts. At the top left is a sine wave with the formula $C = 2\pi r$ and $2 \times 2 = 4$. To its right is a cylinder with radius r and area $A = \pi r^2$. Below the cylinder is a right triangle with a 60° angle and hypotenuse $2x$. To the right of the triangle is a circle with radius r and volume $V = \frac{1}{3} \pi r^3$. At the bottom left is a right triangle with angle θ and hypotenuse h , with the formula $\frac{dy}{\cos^2 \theta} = u$. In the center is a cartoon illustration of a man's face.

a) $2 \text{ dam}^2 =$

d) $52 \text{ hm}^2 =$

b) $4,25 a =$

d) 7,4 ha =

d) $954,245 \text{ dm}^2 =$

d) $(72 \text{ hm}^2 \ 40 \text{ dam}^2 \ 56 \text{ m}^2) : 8 =$
