

IDEIA DE DIVISÃO

VAMOS PRESTAR ATENÇÃO NO VÍDEO:

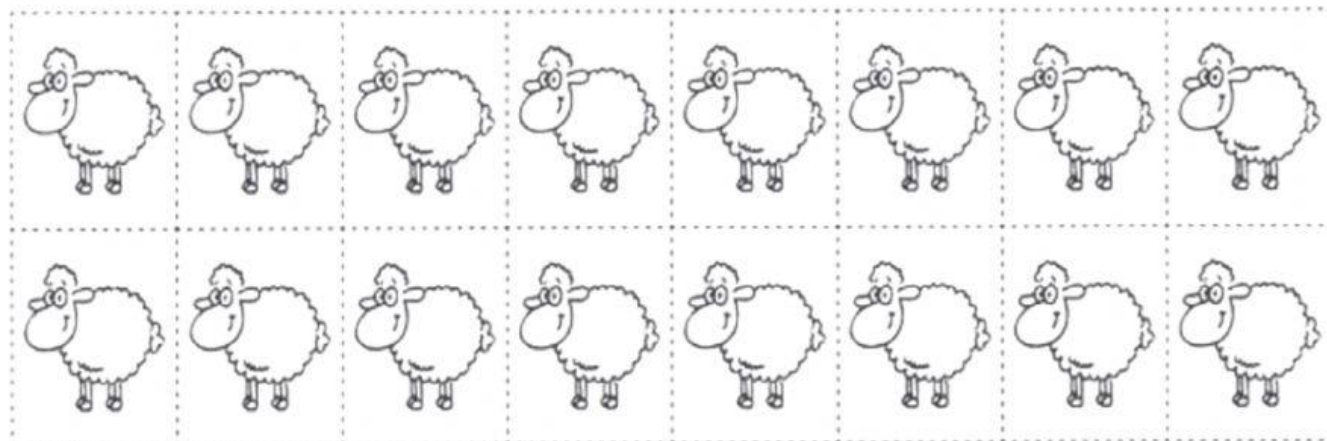

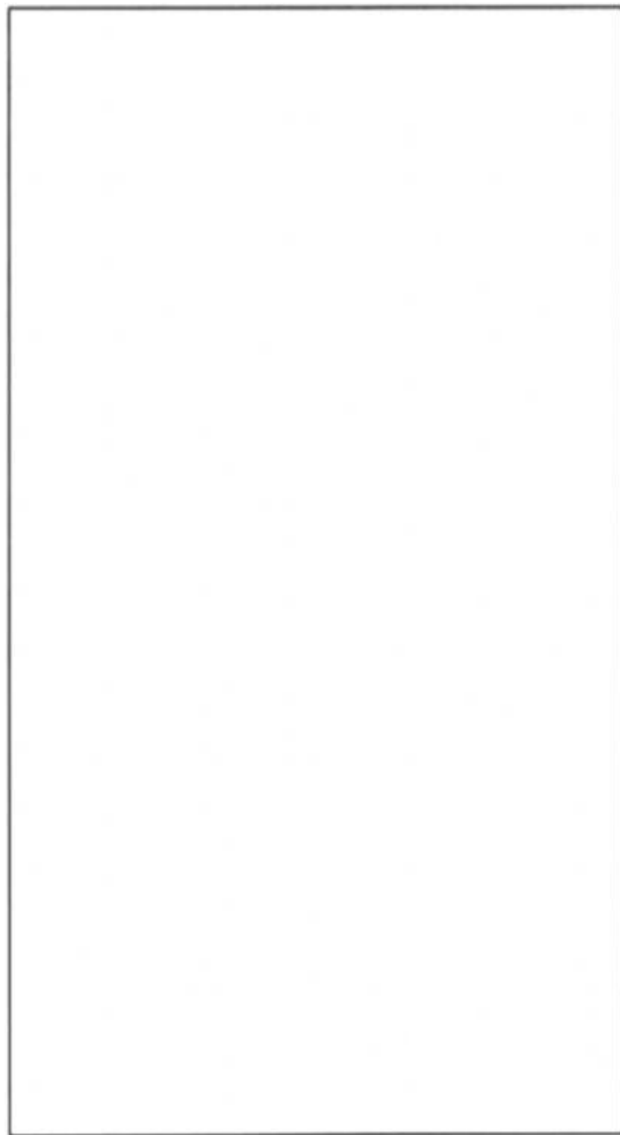

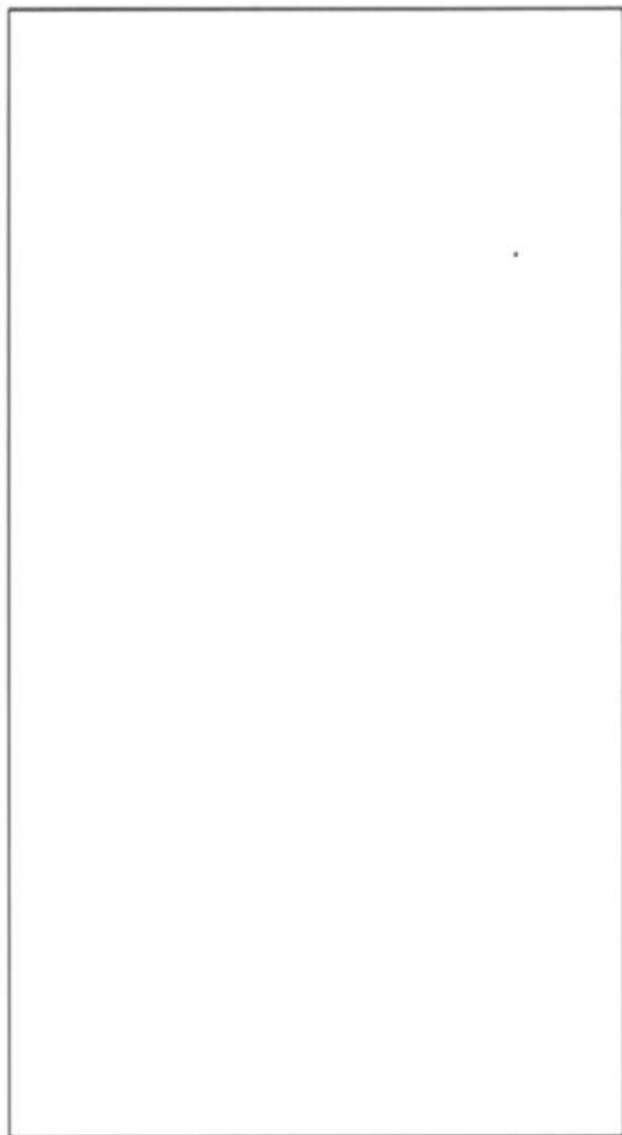

AQUÁRIOS

Dona Iracema vende aquários com peixes. Ela recebeu 20 peixes e quer dividi-los igualmente em 4 aquários. Recorte os peixes recebidos por dona Iracema e cole-os nos espaços que representam os aquários:

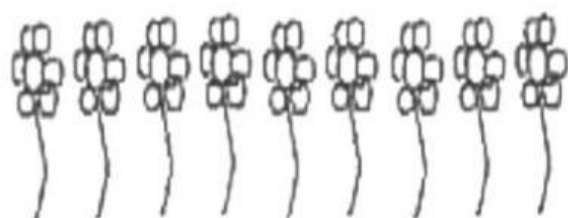

AS OVELHAS

Dezesseis ovelhas se misturaram no campo de pastagem. Divida igualmente as ovelhas em dois pastos. Recorte as ovelhas e cole-as nos pastos.

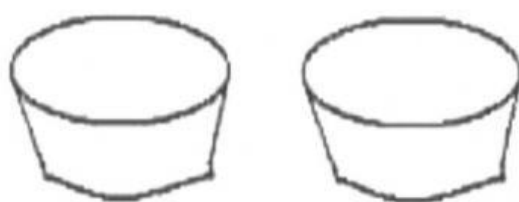

Represente estas divisões corretamente:

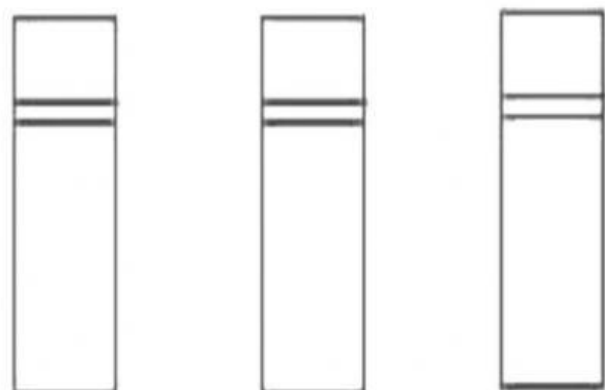

$$9 \div 3 = \underline{\quad}$$

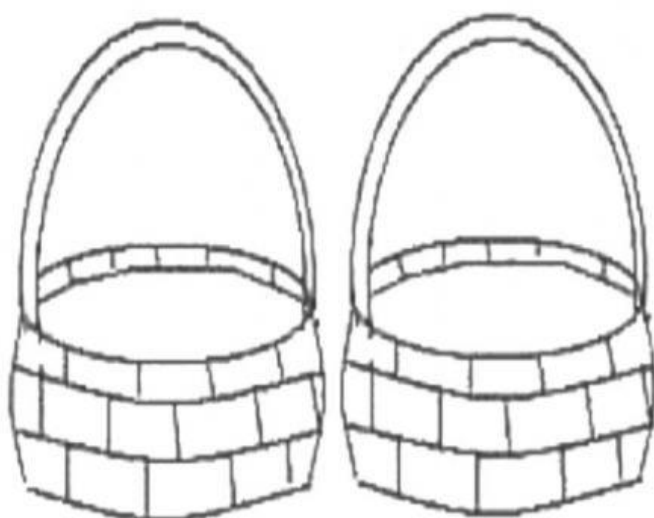

$$8 \div 2 = \underline{\quad}$$

$$15 \div 3 = \underline{\quad}$$

$$12 \div 2 = \underline{\quad}$$

Resolva as divisões:

$12 \div 4 = \text{cloud}$

○ ○ ○ ○	○ ○ ○ ○	○ ○ ○ ○	○ ○ ○ ○
---------	---------	---------	---------

$15 \div 3 = \text{cloud}$

--

$10 \div 2 = \text{cloud}$

--
