Name: _____

- 1.) Kason went to Bela's bakery and ordered 3 mango smoothies, 3 chocolate-covered cherries, and 1 peanut butter cookie. How much money did he spend?
- 2.) Bela's parents visited her bakery and ordered 24 peanut butter cookies to serve at a party. How much did they spend?
- 3.) Brian and Josie are getting married. At their wedding, they decided to serve 2 of the three-layer coconut cakes and 2 of the three-layer cherry cakes. They also bought 100 chocolate-covered cherries to put at people's seats. How much did they spend?
- 4.) The girls on Bela's soccer team stopped by her bakery after their game. They were very thirsty. All 12 girls bought a smoothie. How much did the girls spend in all?
- 5.) The Anderson family visited Bela's bakery before going on a long road trip. They decided to stock up on treats to eat on the road. They purchased 2 chocolate chip cookies, 2 cups of coffee, 2 peanut butter cookies, 5 chocolate-covered strawberries, and 1 lemon bar. How much money did they spend in all?

- 6.) Charlotte and Kesha visited Bela's bakery. They sat in the cozy purple seats as they worked on a school project together. They each bought a cup of tea and a cookie. How much did they spend in all?
- 7.) Ms. Hernandez purchased many items at Bela's bakery for her daughter's birthday party. She purchased the three-layer cherry cake, 12 mint chocolate chip cupcakes, and 12 chocolate chip scones. How much money did she spend?
- 8.) Ryan went to Bela's bakery with \$12.00. He bought a lemon bar and a cup of coffee. How much money did he have left?
- 9.) Bela started out the day with \$40.00 in her cash register. Throughout the day, she sold 20 of the three-layer cakes, 4 scones, 9 cups of coffee, 2 pomegranate chocolate bars, and 1 lemon bar. Bela gave her brother \$5.00 from the cash register that she owed him. How much money does Bela have in the cash register now?
- 10.) Kenzie has \$5.00 in her pocket. Does she have enough money to buy a chocolate chip scone and a cup of tea? If not, how much more money does she need? If so, how much money will she get back?
