

Space problems

Part III

John wanted a chocolate cake for his birthday. After blowing out the candles, he cut the cake. Out of his 12 party guests, only 6 ate cake. John let his friend Jackson take half the remaining cake home. What fraction of the cake was left over?

My answer

Mrs. Potter bought 160 index cards. She gave the first row 55 index cards, then the second row 72 index cards. How many does she have left to give to the last row?

My answer
