

Mathematics Form 1
Linear Equations Practice 1

1. Solve
 $2x = -8, 3x + 2y = 8$
 $x = \underline{\hspace{2cm}}, y = \underline{\hspace{2cm}}$
2. Solve
 $x + y = 10, x - y = 2$
 $x = \underline{\hspace{2cm}}, y = \underline{\hspace{2cm}}$
3. Solve
 $2x + 3y = 2, x - 5y = 14$
 $x = \underline{\hspace{2cm}}, y = \underline{\hspace{2cm}}$
4. Solve
 $2x + 3y + 2 = 0, 3x - 6y - 39 = 0$
 $x = \underline{\hspace{2cm}}, y = \underline{\hspace{2cm}}$
5. Solve
 $x = 4y, 2x - 5y = 12$
 $x = \underline{\hspace{2cm}}, y = \underline{\hspace{2cm}}$
