SB2.a_3.4_DNA REPLICATION VS. TRANSCRIPTION VS. TRANSLATION

Identify the differences and similarities between the 3 process above.

	DNA Replication	TRANSCRIPTION	TRANSLATION
1. What does it produce?			
2. Where does it happen?			
3. What Nitrogen bases are involved?			
4. What types of nucleic acids are involved?			
5. What types of RNA are involved?			
6. Does this need enzymes?
