

Food chains: Matching activity

Draw a line to match the term with its description.

Food chain	gives energy as heat and light.
Apex consumer	shows how energy flows between things.
Producers	animals that eat other animals.
Grasshopper	animals that eat plants.
Food web	breaks down dead animals and plants into nutrients for soil.
Decomposers	cannot make food.
Herbivores	network of interconnected food chains.
Sun	not hunted or eaten and is at the top of a food chain.
Carnivores	a primary consumer.
Consumers	make their own food, ex. plants.
