Let's Learn!

Parallel lines are two straight lines that will *never meet* no matter how long they are drawn.

The distance between them is *always the same*.

Choose **4** objects with parallel lines

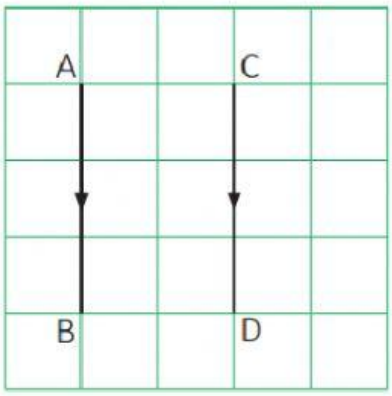

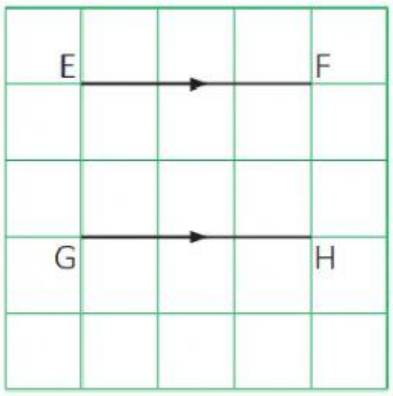

LIVEWORKSHEETS

These lines are drawn on a square grid.

AB and CD are parallel lines.
We write: AB // CD

EF and GH are parallel lines.
We write: EF // GH

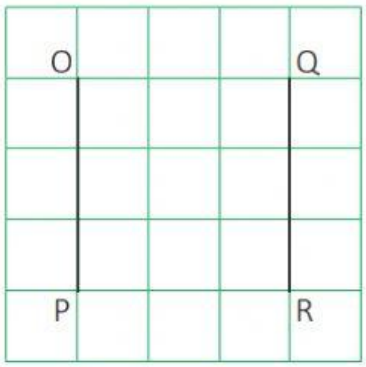

// stands for **is parallel to**.
We mark arrowheads to show lines are parallel.

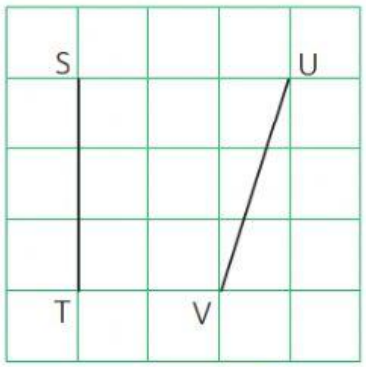

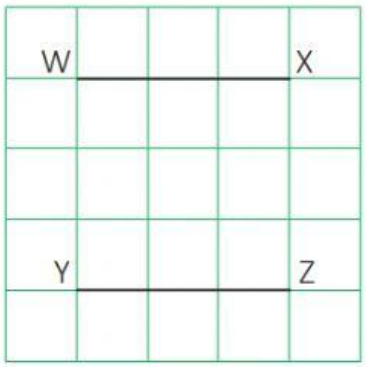

These are lines drawn on square grids.

Which pairs of lines are parallel?
