Homework 11/1/21

Reading Homework:

Hero of the Soviet Union

On March 6, 1937 a daughter named Valentina Tereshkova was born to a tractor driver and a factory worker in the Soviet Union. Her family was poor and her father died when she was young. Even so, she was able to start school when she was eight years old. At age 16, she left school to work in a textile plant like her mother, but continued to go to school through a correspondence course (sending work in by mail). She was an amazing young woman and able to juggle both work and school.

As a young woman, Valentina became interested in parachute jumping. Valentina was brave to be involved in such a dangerous sport, but this is what changed her future. It caused her to be picked for the cosmonaut program. After training, Valentina was launched into space on June 16th 1963. This made her the first woman to travel in space. During her 3 day mission she orbited earth 48 times.

She was an amazing young woman and able to juggle both work and school.	fact / opinion
Valentina was brave to be involved in such a dangerous sport, but this is what changed her future.	fact / opinion
As a young woman, Valentina became interested in parachute jumping.	fact / opinion

LIVEWORKSHEETS

Valentina later married another cosmonaut named Andrian Nikolayeve. They had a child named Elena. She has an interesting family since both her parents traveled into space! Valentina never returned to space, but because of her accomplishment, she became known as *The Hero of the Soviet Union.*

Lexile: 800-900

She has an interesting family since both her parents traveled into space!	**fact**
