

Multiple Steps Money Word Problems

Direction: Just write the answers and do not forget the dollar sign (\$).

1. Jerod is buying some clothes online. The online store has free shipping for orders of at least \$50. Jerod has a T-shirt that costs \$18.98 and a short pants that costs \$17.95 in his cart. How much more does Jerod need to spend to get free shipping?
2. Mr. and Ms. James are going to see a movie. Tickets normally cost \$44.85 but they get a discount of \$5.00 on each ticket. How much will they pay altogether for their tickets?
3. Dave and Alex decide to go to the cinema. They each buy a ticket for \$13.95, and they pay \$ 4.50 for parking. If they had \$50.00 to start, how much do they have left to spend in the mall?
4. Martha and Jill go to the ice cream shop. Martha gets a strawberry ice-cream that costs \$5.35 and Jill gets a peanut ice-cream that cost \$5.85. They pay with a twenty-dollar bill. How much change will they receive?
5. Seon is shopping for new clothes today. He returns a pair of sneakers and gets a store credit of \$38.98. He also buys vests that cost \$34.79 and a shirt that costs \$ 24.75. How much does Harry owe for his new purchases if he uses the store credit?
