

So, our project is going to ¹⁾ []. Firstly, comparing the main forms of ²⁾ [] energy: solar, wind, wave, and bio fuels ³⁾ [] production costs. Secondly, we'll take solar energy as an example and ⁴⁾ [] and lastly we'll analyse whether they're ⁵⁾ [] traditional ⁶⁾ [] in the future.

That sounds like a comprehensive project with ⁷⁾ []. Now, what data are you going to use and ⁸⁾ [] will you use for the analysis?

Ah! Now that's something we *do* agree on! We want to use ⁹⁾ [] in our last lecture and some ¹⁰⁾ [] from the government Environment and Energy Department. In terms of analysis, we're going to use a cross-referencing ¹¹⁾ [] each of the government reports with the Robertson report and highlight any differences. Then we'll ¹²⁾ [] to see why the differences exist and where ¹³⁾ [].
