

A) What are the most important characteristics of living things?

1 _____

2 _____

3 _____

4 _____

B) How do we call these characteristics?

C) What makes us different from non-living things?

1 _____

2 _____

3 _____

4 _____

D) What are the basic life processes?

1 _____

2 _____

3 _____

E) What is a cell?

F) What is different between animal cells and plant cells

G) How do most cells reproduce?

H) Associate

Cell

Tissue

Organs

Systems and apparatuses

Circulatory

muscle

basic unit

heart

I) Write the name of the five kingdoms and complete the table . Choose the right ones

	M	P	F	P	A
Multicellular					
Live on land					
Live in water					
unicellular					
Live in air					
Live inside other organism					
Make their own food					
Can move					

Draw a cell:
