

## Multiplying and dividing by powers of 10

Solve each problem and then relate the unit of measurement of the result.

$$71 \text{ mg} \div 10 =$$

$$34 \text{ m} \times 100 =$$

$$390 \text{ mm} \div 1000 =$$

$$60.5 \text{ m} \times 1000 =$$

$$52.1 \text{ mm} \div 10 =$$

$$14.3 \text{ g} \times 100 =$$

$$9 \text{ cm} \div 100 =$$

$$4.3 \text{ kg} \times 1000 =$$

$$10.4 \text{ l} \div 1000 =$$

$$6.03 \text{ cg} \times 10 =$$
