

## MATHEMATICS YEAR 5

### Topic: Volume of Composite Shapes

1.

Volume Cuboid

$$10 \text{ cm} \times 8 \text{ cm} \times 17 \text{ cm} = \text{cm}^3$$

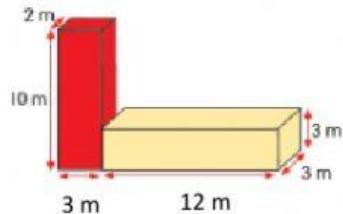

Volume Cube

$$8 \text{ cm} \times 8 \text{ cm} \times 8 \text{ cm} = \text{cm}^3$$

Total of Volume

$\text{cm}^3$

2.

Volume Red Cuboid

$$m \times m \times m = \text{m}^3$$

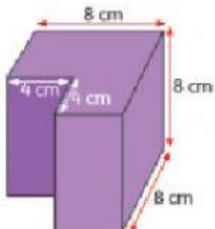

Volume Beige Cuboid

$$m \times m \times m = \text{m}^3$$

Total of Volume

$\text{m}^3$

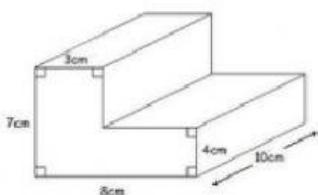

3.

Do your calculation in a piece of paper, write your answer here.

$\text{cm}^3$

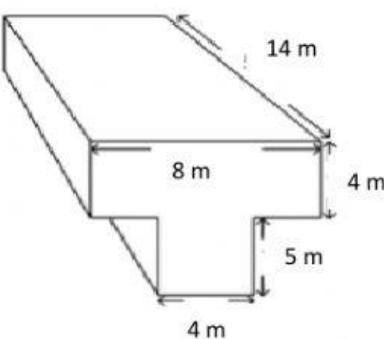

4.

Do your calculation in a piece of paper, write your answer here.

$\text{cm}^3$

5.

Do your calculation in a piece of paper, write your answer here.

$\text{m}^3$
