Washing Hands

You have to do many things when you wash your hands. First, you have to turn on the water. Then, make sure it is not too hot. Squirt a bit of soap on the palm of your hands. After that, rob your hands together until there are bubbles all over them. Then, rinse your hands. Lastly, dry your hands. That is a lot of work!

Rob your hands together	
Squirt soap on the palm of your hands.	
Dry your hands.	
Turn on the water	
Rinse your hands
