Himeji Castle is the largest and the most visited castle in Japan.

The castle is on top of a hill. It is one of Japan's National Treasures and a UNESCO World Cultural Heritage Site. It was built in the 14th century. Since then, people have kept its structure the same. The castle is made from stone and wood. It has gray roofs and white walls with moats around it. The moats were used to protect people inside the castle. Visitors can go upstairs on narrow staircases. Each level gets smaller as you go higher. This large castle gets up to 15,000 visitors a day and is known all around Japan.
