3. The / is / snake / the / color / The / as / grass / same / . /
A. The snake is the grass same as the color.
B. The snake is the same color as the grass. 

III. Read and choose T (True) or F (False).

Some animals have camouflage to hide and stay safe. This means that they can change color and look the same as things around them.

The chameleon can change its color. If a chameleon is on green leaves, it changes to green. Other animals can't see it and eat it. The chameleon can hide and catch other insects to eat them.

The flower spider is very good at camouflage. It sits on flowers and changes its color to the color of the flower. This keeps it safe.

The cuttlefish can change color very quickly. It can also change shape! It can look like the rocks and plants next to it. This means bigger fish can't see it, so it is safe.

1. Some animals change color to stay safe.
2. Chameleons change color to hide and catch other insects.
3. The flower spider is not very good at camouflage.
4. The cuttlefish can change the color and the shape.
5. Bigger fish can always see a cuttlefish.
