Prepositions of place with questions and answers

We can use the verb **be** to ask **yes/no** questions. We change the word order for questions.

Statement	Question	Answer
The lamp is next to the sofa.	Is the lamp next to the sofa?	Yes, it is. ✓
		No, it isn't. ✗

Next to, on, in, and between are prepositions of place. They tell us where something is.

The phone is next to the armchair. 	The handbag is in the box. 	The lamp is on the sofa. 
--	--	--

Between means "next to two things", so we use **and** to say the two things on each side.

The doll is **between** the table **and** the armchair.
