

II. Solve each problem.

1)

	6	6	
	×	8	4
+			

2)

	2	4	
	×	8	9
+			

3)

	2	0	
	×	4	8
+			

4)

	4	7	
	×	9	1
+			

5)

	7	7	
	×	2	1
+			

6)

	3	0	
	×	1	1
+			

II. Find each quotient.

7)

1	8	)	7	7	4
			-		
				-	

8)

4	7	)	6	1	1
			-		
				-	

9)

7	8	)	8	5	8
			-		
				-	

10)

2	5	)	8	0	0
			-		
				-	

III. Round to the nearest hundred.

11) 608 → _____

12) 151 → _____

13) 47 → _____

IV. Problem Solving.

Moir, gather 2,000 bottlecaps, she has divided them equally into 5 jars. How many bottle caps are in each jar? Are there any left overs? If so, how many?

A= _____

There are 34 children in the classroom, each student will get 6 dozen pencils. How many pencils will the teacher have to give out?

A= _____
