Digestive system

When we eat food, the **digestive system** breaks it down into **nutrients** that the body needs.

1. Label the picture.

mouth | stomach | oesophagus | small intestine | anus | large intestine

2. Order the process of digestion.

- ◯ The **stomach** breaks the food down into nutrients.
- ◯ The **oesophagus** pushes the food down to the stomach.
- ◯ The food enters the **mouth** and we chew it with our **teeth.**
- ◯ The **large intestine** takes waste to the anus. The waste goes through the **anus**.
- ◯ The **small intestine absorbs the nutrients**. The nutrients pass from the small intestine into the blood, which carries them to all parts of the body.

3. Which is the longest intestine? Choose the correct option.

a) large intestine

b) small intestine
