Name Class no.

1. Matching the equation and the solution of equation

1. $z - 3 = 7$	-7
2. $18 + x = 36$	13
3. $2x + 5 = 45$	10
4. $-2 = -15 + m$	18
5. $-24y = 168$	20

2. Fill the solution of equations in the blanks

1. $k + 5 = 16$ therefore k =
2. $\frac{40}{m} - 3 = 2$ therefore m =
3. $7n + 15 = 43$ therefore n =
4. $8p - 7 = 65$ therefore p =
5. $\frac{x}{12} + 18 = 21$ therefore x =
