Name   Class   no.

Exercise 2

### 1. Matching the equation and the solution of equation

1. $z - 3 = 7$ -7

2. $18 + x = 36$ 13

3. $2x + 5 = 45$ 10

4. $-2 = -15 + m$ 18

5. $-24y = 168$ 20

2. Fill the solution of equations in the blanks

1. $k + 5 = 16$ therefore $k =$

2. $\dfrac{40}{m} - 3 = 2$ therefore $m =$

3. $7n + 15 = 43$ therefore $n =$

4. $8p - 7 = 65$ therefore $p =$

5. $\dfrac{x}{12} + 18 = 21$ therefore $x =$
