

Food chains and habitats

2 **Think!** Read and draw arrows to make food chains.

A food chain shows us what animals eat. All food chains start with the sun and plants. Plants use the sun to grow. Some animals eat plants to get energy. Some animals eat other animals to get energy.

Grass gets energy from the sun, rabbits eat grass and foxes eat rabbits. This is an example of a food chain.

Drag and drop the pictures to complete the food chains

A three linked food chain

Carrots

Rabbit

Fox

A four linked food chain

Grass

Grasshopper

Frog

Eagle

A five linked food chain
