

1. Reduce a común denominador

$$\frac{3}{4} \text{ y } \frac{5}{8} =$$

$$\frac{5}{6} \text{ y } \frac{7}{12} =$$

$$\frac{2}{3} \text{ y } \frac{9}{11} =$$

$$\frac{1}{3} \text{ y } \frac{12}{23} =$$

$$\frac{4}{5} \text{ y } \frac{11}{20} =$$

$$\frac{9}{10} \text{ y } \frac{25}{40} =$$

$$\frac{2}{8} \text{ y } \frac{15}{24} =$$

$$\frac{8}{9} \text{ y } \frac{17}{36} =$$

$$\frac{12}{15} \text{ y } \frac{20}{30} =$$

$$\frac{5}{7} \text{ y } \frac{22}{29} =$$
