

Simplify the fractions.

$$\mathbf{a} \frac{8}{12} = \text{---} \quad \mathbf{b} \frac{10}{16} = \text{---} \quad \mathbf{c} \frac{6}{10} = \text{---} \quad \mathbf{d} \frac{8}{12} = \text{---}$$

Change the improper fractions to mixed numbers.

$$\mathbf{a} \frac{16}{3} = \text{---} \quad \mathbf{b} \frac{13}{8} = \text{---}$$
