Science: Natural Resources Notes

What are Natural Resources?

A Natural Resource is something found in **nature or on earth** that people use to meet their needs. Natural resources are not man made. Natural resources include **air, water, soil, plants, animals, minerals and fuels.**

Our greatest natural resources in The Bahamas are: our clear blue waters, clean beaches, the climate, and our blue holes.

How are Natural Resources used?

We need **Oxygen**/air to breathe, **water** to drink, **soil** for plants to grow and **minerals** to make coins, furniture and jewelry.
