CONSOLIDATION

HOMEWORK

C. Match the concept with the definition:

CONCEPT	DEFINITION
tiny	fine powder made from a particular substance.
matter	to turn around repeatedly.
dust	the middle layer of the Earth that is between the top crust and the inner core.
spin	the thing that forms physical objects and occupies space.
mantle	very small matter.

D. Read the article and notice the verbs in simple past:

Origin of the universe and planet

The most accepted theory that explains the origin of the universe states that it all started 14 billion years ago. Back then, there was a tiny particle, like an atom, which was very hot and dense. This particle exploded causing the universe to form; matter started to expand and created millions of galaxies. The galaxy we live in is called the Milky Way.

Our planet is approximately 4.5 billion (4,567,000,000) years old. Its origin is still a mystery today, but some theories exist. The "Core Accron Theory" states that at the beginning, our solar system was rotating dust and gases. Then, the primitive sun's gravity attracted these materials and they all started spinning around it. Some clouds formed and became solids. Our planet was formed by a solid metal core, a liquid mantle and a thin but hard crust.

CULTURE

Many cultures have different views about the creation of the universe and the Earth. For instance, China has a legend about a bored giant who shook the universe causing a huge explosion that created lots of stars and planets. Ancient Egyptians believed the god Ra created the universe with his body fluids.

E. Read again and answer the following questions. Acoordind with the most accepted theory

1. When did the universe start? _____
2. How old is our planet? _____
3. What is our Galaxy's name? _____
4. Who was the Ancient Egyptians god? _____
5. Why is our origin a mystery? _____
6. Where did people believe that our universe is originated by a huge explosion? _____

Resources: computer, mobile phone, internet, portfolio folder, sheets. Teachers, parents

Did you know?

The simple past tense usually uses for story telling or there is in narrative and recount text.

Remember

A wh-question is used for seeking content information relating to persons, things, facts, time, place, reason, manner,

Curious fact…

Different verbs change in different ways to make the past tense.

Relationship with values

Respect
