

Landforms

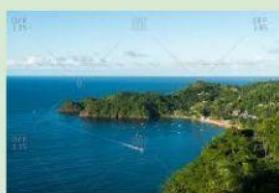

Connect the picture of a landform with its name and definition.

River

is a large body of water flowing down from a mountain side and empties into an ocean or sea

Swamp

is a piece of land that is completely surrounded by water

Island

is a flat area of land where the ground is waterlogged (filled with water). The land is also very muddy.

Hill

is a piece of land jutting far out into the sea and is almost surrounded by water

Plain

is a place on the Earth's surface that is higher than the land around it.
It is much taller than a hill.

Mountain

is land that rises above the surrounding land and can reach a height of 300 metres

Peninsula

is the low ground between two hills or mountains

Valley

is land that is flat or almost flat
