Plant Needs

Habitats

Every living thing needs a place to provide it with food, water, and space it needs to survive. This is called a habitat. Some animals live in water only they are called “aquatic animals.” Some aquatic animals can live in habitats such as the sea like a fish, or oceans like a whale. Another type of habitat is a desert. A desert is a dry place with little to no water. Some animals that can survive in this habitat are camels and rattlesnakes. Some plants such as a cactus can live there also.

The Creation Story

The first day (1st) - light was created.

The second day (2nd)- the sky was created.

The third day (3rd)- dry land, seas, plants and trees were created

The fourth day (4th)- the sun, moon and stars were created

The fifth day (5th) - creatures that live in the sea and creatures that fly were created.

The sixth day (6th) - animals that live on the land and finally humans, made in the image of God were created.

The seventh day (7th) - God finished his work of creation and rested, making the seventh day a special holy day.

7 Days of creation
