

Remember, where is the food?:

1<sup>st</sup>-teeth, 2<sup>nd</sup>-stomach, 3<sup>rd</sup>-small intestine,  
4<sup>th</sup>-large intestine, 5<sup>th</sup>-anus.

## WHERE DOES FOOD GO?

We eat, process and expel food through our **digestive system**.

The **small intestine** absorbs the nutrients.

We chew food with our **teeth**.

The **large intestine** takes waste to the anus.

The waste goes out through the **anus**.

The **stomach** breaks the food down into nutrients.
